

## Short-Manual for i3-Max mobile/VX vertical garden

Detailed video documentation at:

[www.i3-garden.at/en/anleitungen](http://www.i3-garden.at/en/anleitungen)

 <p><i>Tip: Before filling, the bag should be nicely attached to the body wall</i></p>	<p>content: 2x body parts(1), 1x flat garden(3), 1x substrate-bag (4), 5x i3-Dock Sets (5) à 6 pcs with i3-lids, Max mobile: 1x mounting-set (4 velcro stripes, 10x screws&amp;nuts; i3-sticker), 1x base plate(2), 4x wheels(7) / Max VX: 1x mounting-set „Max VX“ (2 mounting-stripes PS, 10x screws&amp;nuts, i3-sticker)</p> <hr/> <p><b>i3-Max - accessories:</b> please see <a href="http://www.i3-garden.com/shop">www.i3-garden.com/shop</a> i.e. the i3-Max – autom. Irrigation system etc.</p>		
 <p><i>For some regions, the body is pre-assembled.</i></p>	<p><b>Step1 – Korpus</b> Connect the 2 body parts with the screws (outside) + nuts (inside). -The mounting strips of body part(8) (=with sticker on top) are outside = overlap the body part (7)</p>		<p><b>i3-Max VX –Step2 –</b> <b>Connect the mounting strips with the body</b> Put the i3-Max upside down, insert the 2 mounting strips PS by slightly bending them into the flaps of the bottom.</p>
 <p><i>Tip: Velcro straps -smooth surfaces to the outside make it easier to pull through the base plate.</i></p>	<p><b>i3-Max mobil Step2/1 – Mounting the velcro straps + wheels</b> <b>A:</b> Place the i3-Max on the head, pull each of the 4 velcro strips through the 4 flaps of the bottom (smooth surface to the outside), overlap the ends slightly = connect. <b>B:</b> Press the 4 wheels into the openings of the base plate</p>		<p><b>i3-Max mobil –Step2/2 – connect base plate to the body</b> <b>C:</b> Hold the base plate over the body, pull the 4 velcro straps through the slots and place the base plate on the body, velcro straps slightly taut. <b>D:</b> 2 gegenüberliegende Klettstreifen öffnen und „schichtweise“ überlappen=verbinden. Open the 2 opposite velcro straps and overlap layered = connect.</p>
 <p><i>Tip: After approx. 40cm filling, pull the bag up several times to make sure that the floor is filled nicely.</i> <i>Tip: Pull the bag for filling over the body edge. After filling, put it inside the earth, as the earth substrate drops down over time = refill after about 4 weeks.</i></p>	<p><b>Step3 – insert substrate-bag</b> Insert the substrate bag – make sure that the substrate bag is nicely attached to the body wall.</p>	 <p><i>TIP: Breakout = plant sign re-writable with pencil</i></p>	<p><b>Step4 – i3-Dock(5) -Mounting</b> Cut the bag round with scissors or knives at desired positions, , remove breakouts = <b>plant signs</b>. Bepflanze i3-Docks(5) passend in den Korpus einführen, leichte Drehung nach rechts = verriegelt. Insert the planted i3-Docks (5) into the cobody, light rotation to the right = locked.</p>
	<p><b>Step5 – Flat garden(3)</b> Insert the flat garden(3) into the recesses, fill with substrate.</p> <p><b>accessories:</b> <a href="http://www.i3-garden.com/shop">www.i3-garden.com/shop</a> <b>i3-Max automatic irrigation system</b></p>		<p><b>WARNING: i3-Max mobil</b> <b>Do not tilt over the base plate – this can result in breakage due to the overload!</b></p>
